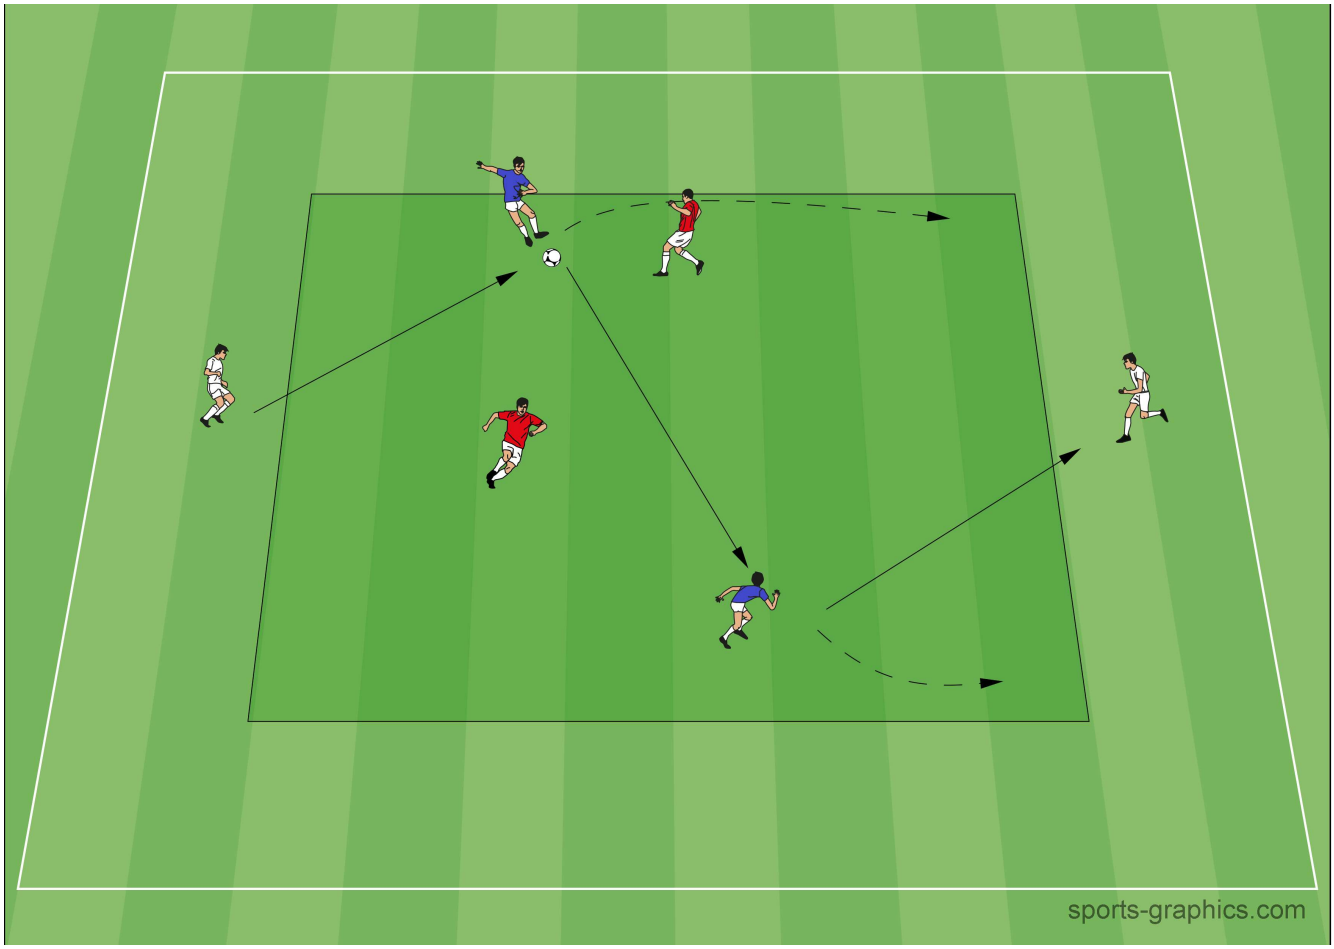
2v2 + 2 Target Players



SETUP: 20X20 yard area. 3 teams of 2 players. One team serves as target players, outside opposite ends.
INSTRUCTIONS: Play 2v2 in the middle. The team in possession scores by passing to the outside target players, receiving the ball back, and passing to the opposite target player without losing possession. When a team scores 3 points the losing team becomes target players.
COACHING POINTS: Escape the pressure by dribbling to the side. Look up and scan the field to find your team mate. Pass to the feet. Turn on the 1st touch. Move off the ball to get open. Create maximum width. When you play to the target both inside players must move wide to create time and space. One defender MUST try to win the ball when it is played to a target player (can go outside the box), and the target player must take a touch to the side to escape the pressure. Target players must move laterally to provide safe passing angles.
