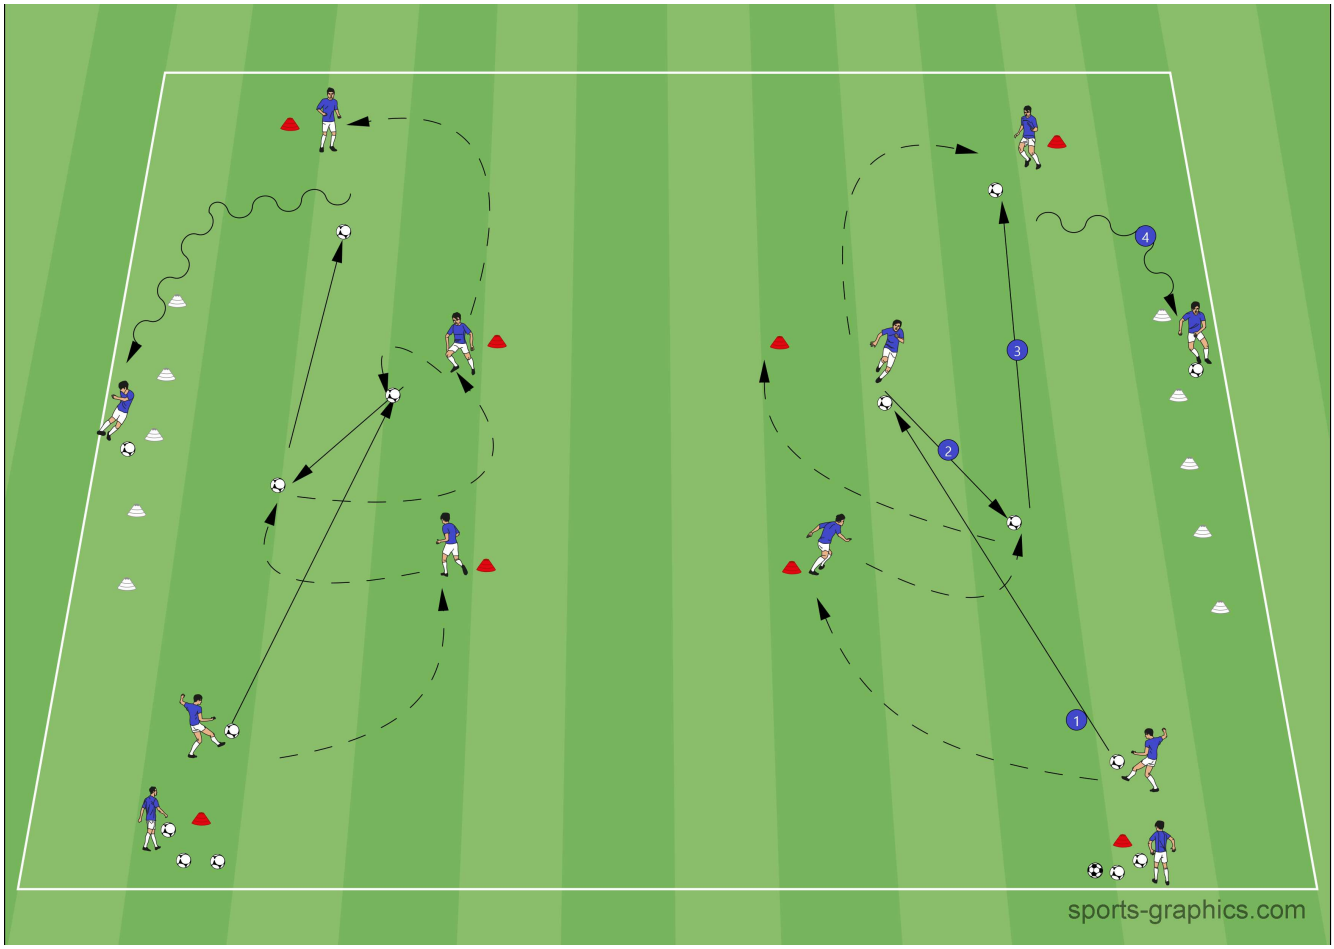
Up Drop Through Passing Pattern



SETUP: See the diagram. Corner cones 30 yards apart. Central cones 10 yards apart.
INSTRUCTIONS: Long pass - short layoff - long pass, dribble back at speed. Players follow their passes each time to the next cone. This is the up-drop-through pattern to link defenders, midfielders and forwards.
COACHING POINTS: Firm passes to the feet. Swing the leg toward the target player to control the accuracy of the pass. Use the inside of the heel with the toes pointing up. Take two touches, and one touch if it is a perfect ball. Passers take a small touch and look up. That is the cue for the receiver to pop away from the cone (defender) sharply before the pass to them is made. Face the direction you are passing to. Switch players to the opposite side so they can do the sequence in the opposite direction as well.
