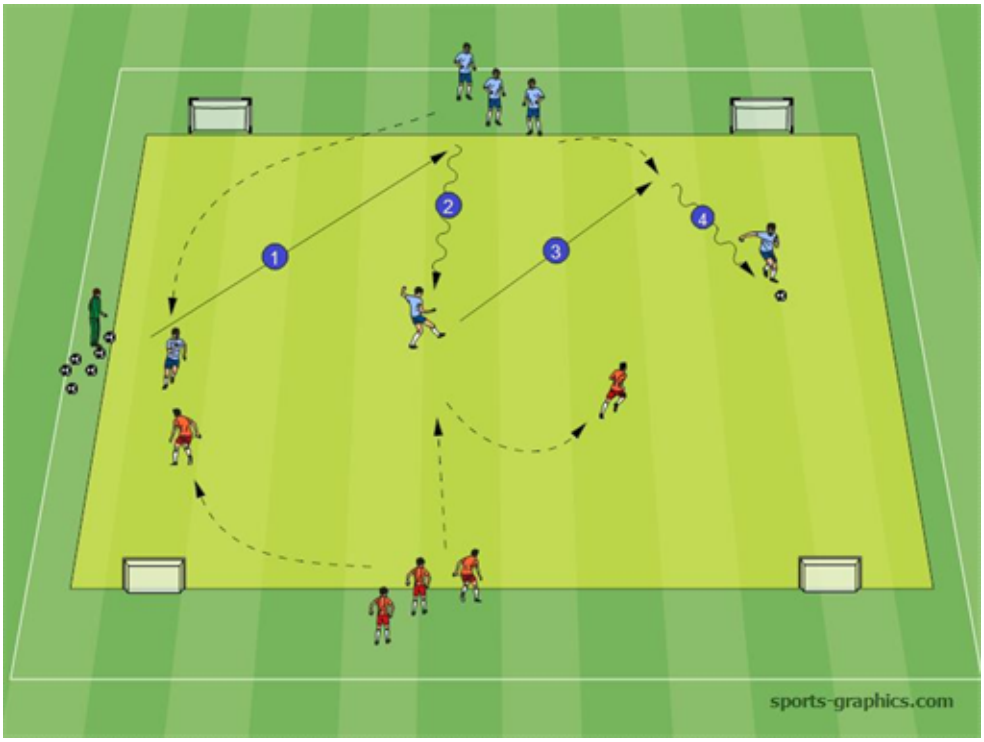
2V2+1+1... 4 Small Goals


Setup: 20X30 yard area. Four small goals. Two teams at opposite ends. Coach has a supply of balls.
INSTRUCTIONS: The coach serves a ball to one team. Play 2V2. Attackers can play a team mate in with a backpass to get numerical superiority, making it 3V2. If defenders win the ball they can play in a team mate or two. The team in possession can have one extra player by passing a team mate in. Play till a team scores or the ball goes out of bounds.
Coaching points: Play a team mate in asap so you have numerical superiority. Be aware what options the defenders are taking away, and what options they are giving you. Make quick decisions. Create time and space. Maximize the width and depth when on attack. Defenders must hustle and always deny the shot on goal as the top priority. When they win the ball play in a couple of team mates to quickly gain numerical superiority.
