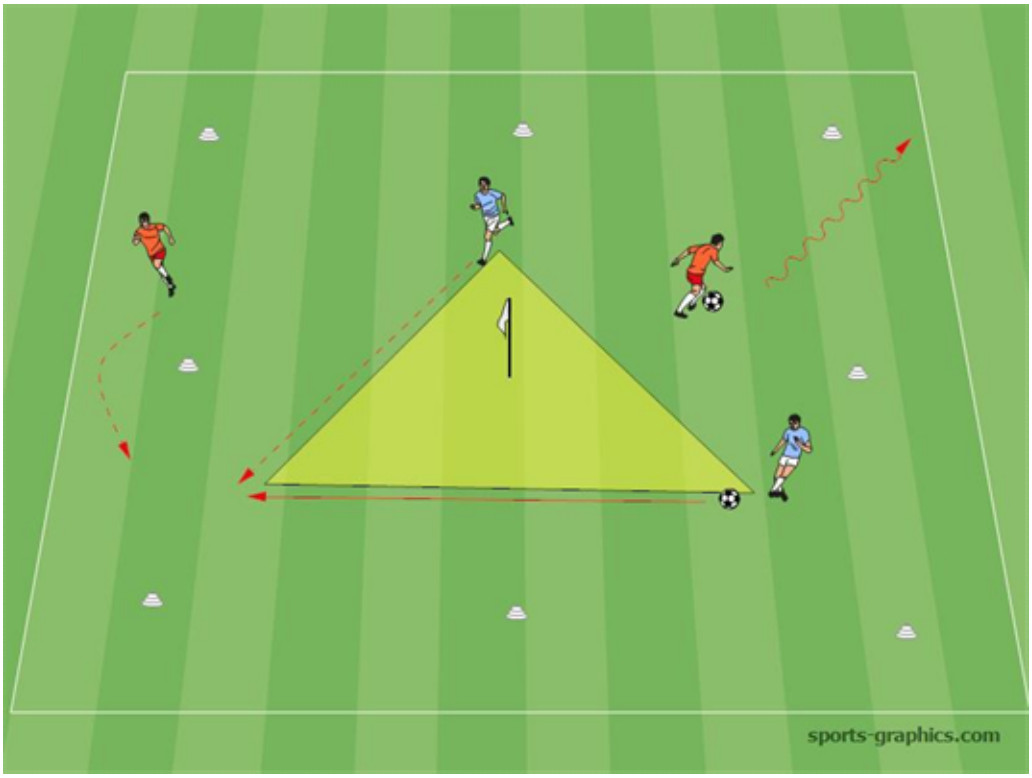
Passing Warmup - Complete The Triangle


Setup: 15X15 or 20X20 yard area. Flag or cone in the middle. Two pairs, each with a ball. Repeat setup for the entire team.
Instructions: Pairs pass to each other by making a run to open space, "completing the triangle". Receiver and open man must run or dribble around an outside cone before repeating. Two pairs share the same space but to not interfere with each other (they just add traffic to work around).
Coaching Points: The critical issue is timing the pass, so it is important for players to observe the right cues. The run comes first, then the pass to space. The cue to start your run is when the man on the ball looks up. The cue for the pass is when the receiver starts the run. Both players must be aware of where the 3rd corner of the triangle is at. Burst of speed when making the run, and communicate: "yes", or "ball".
